

CDF VIP Meeting: 3/28/98

Meeting Notes:

- The VIP budget has been frozen by the Admin. Chief.
- Since the budget is frozen, the completion of the comm van will probably be accomplished in stages.
 - The van is currently being painted (\$3-4K!), and the decals will be applied.
 - All other work on the van will likely be put on hold and completed in phases.
 - The wiring (100A 12v service) will likely be postponed as well. The cost (estimate is \$6K) is higher than expected, but the work will all be done as funds become available.
 - The May 1st deadline for completion of the van is probably not possible.
- As a result, the bus (1629) will remain active for the time being, and must be serviced, cleaned, etc.

- The 4 footings for the new tower at Morgan Hill have been poured (25' deep each).
- The target date for completion of the entire command center is January 1st.

- UTC will be a 2-day event this year, and will occur on Field Day weekend.

- Chris is working on the design of a new VIP vest; a better (classier) design and color. (They will probably be a pocketed vest design, and some color other than green.)

- Fire gear will be returned to all that need and/or had it next meeting (April).

- Joe F. (warehouse contact) is transferring to Ione this week.
