

## VIP Meeting 2013-5-18

The July 20 meeting will be a PPE inspection and shelter training.

Record time on the online time sheet, the meetings are already accounted for.

Possible plan for an up coming meeting is to take about the repeaters under the bed in the tower.

26 Apr: They needed a bear quickly for a county event so they hustled and got a FF off engine 1. There was about 500 school kids at this event and it went pretty well.

4 May: Tower work party went OK. John S. and John W. worked on the cab and Randy and Lyon did the trail and Kim supervised (injured knee). When the tower was cleaned up and ready John let the ECC know and the chief activated the tower for the rest of the day. The lock cable was a bit tough to close. The cable could not be put through all the loops. John S will fix it.

5 May: the Tower was staffed again by Dave and John S.

13 May: All engines in service.

Jim Crawford is now Div 1602 and will be moving in the Wolfe's house on the compound.

The CIC does not have a 220MHz base radio. Something to work on.

Bob Lexzold (sp?) will do the inspection data entry.

The tower now has a BLS trauma bag.

Henry will bring the snacks next meeting

[1-831-459-5955](tel:1-831-459-5955) is a 24x7 emergency contact for Lick. If there is a real emergency call and there is a trained CERT team at Lick, also call it in to the ECC.

Field Day – We would like to do Field Day! We are looking into inviting the hams from Morgan Hill. Also, It was discussed that we would set up 1629 out front and do some PR work. It also may be a good spot for a GOTA station. Lyon will supply the extra call for the event.

July 4 patrols: IAP was found for last year. The Captains are looking into it and are starting to plan for it. Guy and Lyon are talking about using 1629 as an additional lookout and relay point.

Pam Timmerman (sp?) will be taking Chris' spot starting July 1.

6 Min of Safety Wear your PPE!

Training for the day CIC.

Unit Leader Reports.

1629

The van is serviced and new tires so it is good for responses.

Garden.

Got the weeds out. A crew was out cleaning everything up. They are planning on spreading chips. Cleaned up the sidewalk. Need to finish the drip system.

Tower

The tower was opened. Dave K got to see his first fire (Quick Sliver) on Sunday. Didn't get a chance to do much maintenance.

Activations

All is OK.

Web.

The VIP time sheet was updated and there is a bit of help text added. Frank will put out the meeting reminder email.

Logistics.

Mike will need help if a fire comes out.

PIO

No news is good news

CIC

Did a radio test to the crew in the tower all worked OK.

4<sup>th</sup> of July they will active the CIC.

Inspection

791 inspections have been completed. We need volunteers to do the Patterson area. Could be a bit challenging due to a lack of house numbers. Mikey willing to go out.
